

Mistero and Incanto 1st generation

Magic-Fire[®]
by safretti

Ventilation is vital to the product.

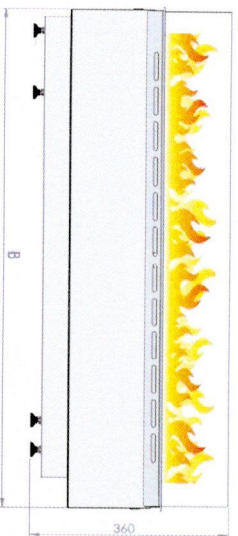

Very important :
Planning fase : incorporate ventilation/
air inlet openings.

All Mistero and Incanto fireplaces need
enough fresh air ;

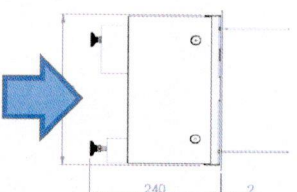

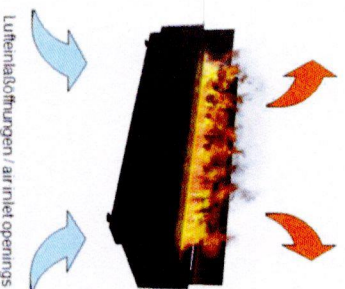

- This is how the flame effect will be created
- If there will be paid no attention to this, the product will get an error quickly.

Wrong installation : no guarantee

Incanto 1000/ Mistero 1000

- Luftleitöffnungen
- Der Kamin muss Luft ziehen können
 - wichtig um den Flammeneffekt entstehen zu lassen (Konvektion)
 - wichtig um die Elektronik zu kühlen
 - Abstand zwischen Gehäuse und Einbauwand, um Luft zirkulieren zu lassen

- Air inlet openings
- The fire needs air
 - important to create the flame effect (convection)
 - important to cool down the electronics
 - Distance between body and wall to let air circulate
